

Water-Plug

The solution to manhole overflow

The **Water-Plug** packed in its own carrying bag is very compact and weighs less than a briefcase.

With the **Water-Plug**, you can quickly remedy to overflow cesspools and sewers.

Simply unfurl and place the **Water-Plug** on the cesspool to contain the overflow water.

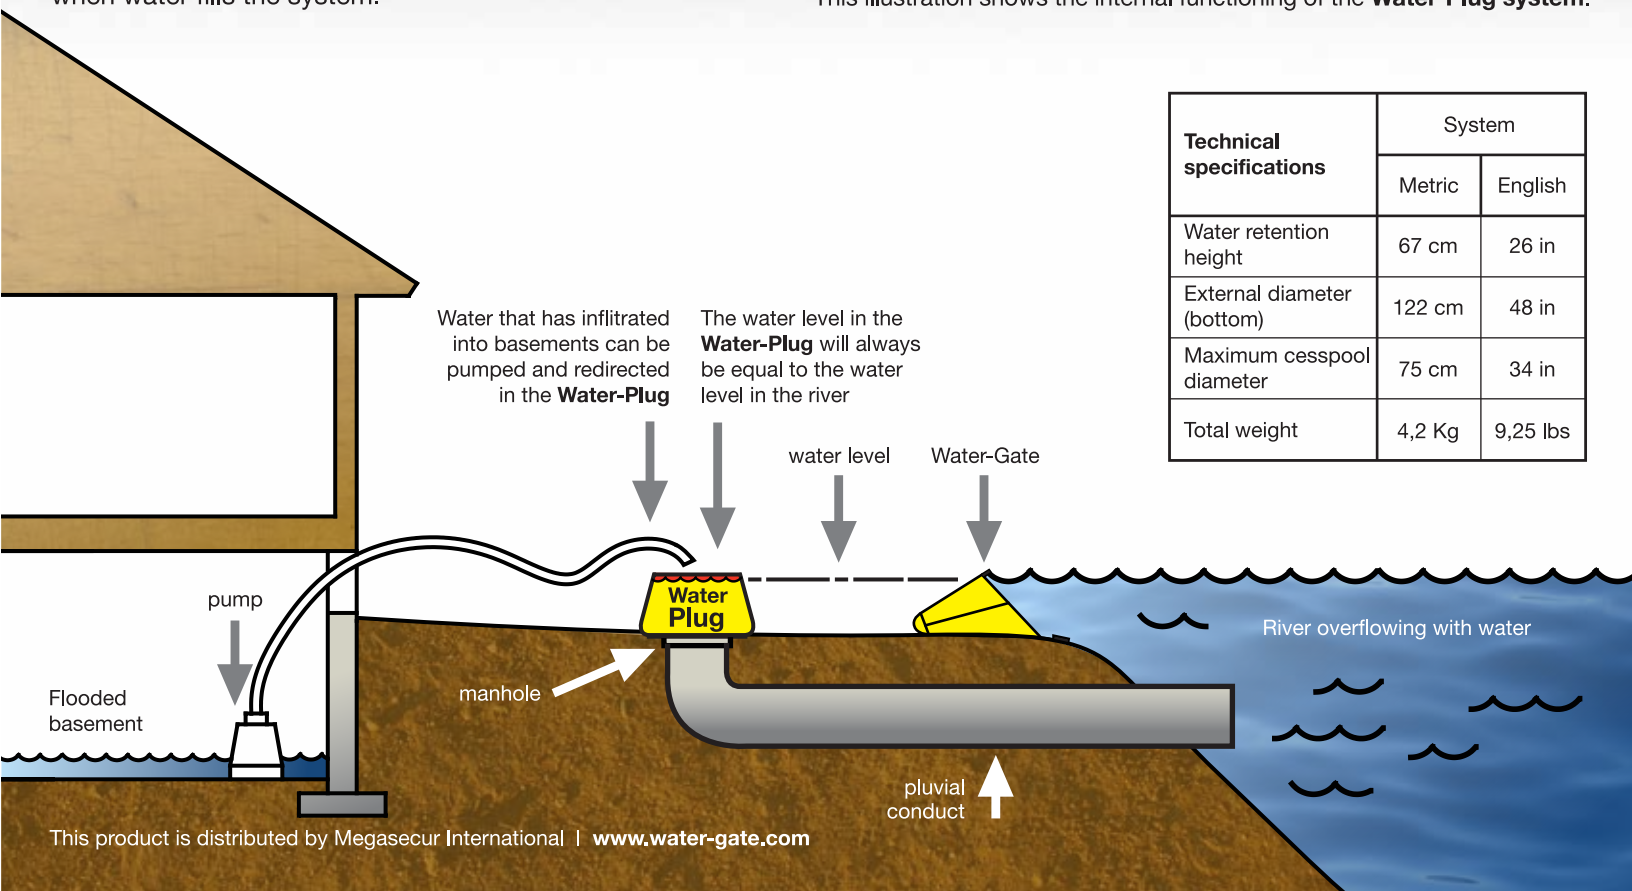

It is as simple as that!

It is the water that holds back the water. Because of the conical form, the **Water-Plug** deploys automatically when water fills the system.

Ballasting to minimise water seeping underneath the **Water-Plug**.

This illustration shows the internal functioning of the **Water-Plug system**.

Water that has infiltrated into basements can be pumped and redirected in the **Water-Plug**

The water level in the **Water-Plug** will always be equal to the water level in the river

Technical specifications	System	
	Metric	English
Water retention height	67 cm	26 in
External diameter (bottom)	122 cm	48 in
Maximum cesspool diameter	75 cm	34 in
Total weight	4,2 Kg	9,25 lbs
